

I understand that there is legislation in the works that might negate IN's "No call" law & replace it with a lower national standard. I want no part of this. Getting on the no call list has been a huge blessing. I was hassased with unwanted, irritating solicitation calls almost daily. Since I signed up I have received two calls from charitable organizations & a couple of calls for surveys but ZERO sales pitches. I couldn't be happier about it. Please do not do anything to weaken the protection afforded me by IN's telephone privacy law. I have the right to say what is & is not invited into my home - solicitation calls are not welcome - ever. Please do not adopt a national standard that strips me of that right.

Thank you,
Christine Mulligan
